## (AMM) TK taps Broner software for new Alabama mill

PITTSBURGH 15 May 2008 23:22

Broner Metals Solutions Ltd., Watford, England, has received an order to provide planning, scheduling, manufacturing execution and warehouse management software for ThyssenKrupp Steel USA LLC's new mill in Calvert, Ala.

Financial terms were not disclosed.

Broner said its software packages will be used in the new plant's hot-strip mill, hot- and cold-rolling mills and galvanizing line, and will cover processes from the arrival of trucks at the slab yard to the shipping of finished products.
