Tisco to extend contract with Broner Metals Solutions

China's Taiyuan Iron and Steel (Tisco) announces that it will ink a new contract to extend its Melt Shop Scheduling and Control solutions with new equipment updates.

Tisco is now running Broner Caster Scheduler and Melt Shop Control Centre for scheduling and management of the Melt Shop in order to improve the processing during production phase.

Meanwhile, Tisco is very confident with the outcome as well as new equipments from Broner Metals Solutions, said the company's project manager. The new systems are able to adapt the current Broner solutions combine with the ladle furnace and double strand caster machine in order to achieve full production by 2010.
